Office Action Summary	Application No. 10/816,208	Applicant(s) SUTHERLAND ET AL.	
	Examiner Mark S. Graham	Art Unit 3711	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicant's election without traverse of the Fig. 6 embodiment in the 5/19/05 paper is acknowledged.

Claims 5, 7-9, 14, 15, 21, and 22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected embodiment, there being no allowable generic or linking claim. Election was made **without** traverse in the 5/19/05 paper.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 10-13, 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Peng '164 (Peng).

The claims are clearly anticipated with the exception of claims 11 and 12. Regarding claims 11 and 12, the barrel, taper and shaft of Peng are considered components integrally joined together.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Peng in view of Hayazaki. Peng discloses the claimed device with the exception of the constant diameter along the core shaft. However, as disclosed by Hayazaki it is known in the art to provide such core shafts of constant diameter. It would have been obvious to one of ordinary skill in the art to have

provided Peng's core shaft in the same fashion if such were more readily available to the ordinarily skilled artisan.

Volpe, McNeely, Chang, Eggiman, Buiatti et al., Wortman, and Peng have been cited for interest because they disclose similar devices.
